KNOWLEDGE AND SKILLS:

- React | Next | React Native | Node | Javascript (ES6) | Typescript | HTML | CSS/SASS.
- ChakraUI | Tailwind CSS | Styled Components | Rest API | GraphQL | Redux | Jest | Enzyme | React Testing library.
- Git | Gitlab | Prisma | Hygraph | MongoDB | Webhooks | Design System | Figma | Cloudflare | Wordpress.
- Jira | Redmine | Scrum Methodology | Git Flow | Fluency in English.

PROFISSIONAL EXPERIENCES:

FrontEnd Developer | Mouri Tech (Remote) | 06/17/2024 until now.

- Working as a React and React Native developer for the client Builder.ai customizing and supporting projects initially built with artificial intelligence.
- Participating in daily meetings with developers around the world with communication in English.
- Organization in the development of commits and branches using Git Flow.
- Delivery of features with unit and e2e test coverage, using libraries such as Jest, React Testing library and Enzyme.
- Developing mobile application projects aimed at popular interest such as: Media sharing, Social matching and Health monitoring.

FrontEnd Analyst 2 | EQI Investments (Remote) | 06/26/2023 until 10/09/2024. (1 year and 4 months)

- Landing Page Development using React | Next with Typescript with integration and data consumption via GraphQL.
- Creating structure and performing content manipulation using Hygraph CMS.
- Development of a standard Design System with custom ChakraUI styles and components to be used in Lps.
- Development of Webhooks with integration with Sales Force and external TikTok API for lead conversion, maintaining data backup in MongoDB.
- Using Cloudflare and Microsoft Azure to configure and publish projects in production.
- Unit test coverage with Jest and end to end tests with Cypress.
- I was responsible for improving the loading performance of a highly relevant company project, where I applied React Query's persistent cache to optimize the loading time from 20 seconds to less than 2 seconds.
- Implementation of plugins in Wordpress to facilitate the work of the Marketing team in creating dynamic LPs. This allowed a better experience for future clients, facilitating contact with investment advisors.
- I worked on implementing the project responsible for capturing the most leads for the company.

Frontend Developer | Dart Digital (Remote) | 07/25/2021 until 02/13/2023 (1 year and 7 months)

- Implementing features in institutional projects, internal systems, portals and other projects built with React and Typescript. Building robust, performant and modern code to maintain cleaner and error-free code in the future.
- Identifying and creating bug tasks in Jira after testing the application.
- Integration and consumption of Rest API using the Axios library and native Javascript Fetch API.
- Building responsive projects based on the Figma layout, using libraries such as: Styled Components, Material UI and Ant Design.

Trainee Frontend Developer | InterfaceIT (Remote) | 12/01/2020 until 07/22/2021 (8 months)

- Development of components for an ongoing project, using React to customize pre-existing components of the Microsoft Sharepoint online platform.
- I worked on the development of a corporate intranet system, offering functionalities for the use of the company's employees. Components such as sliders, accordion, menu, player, news feed, among others, were customized to meet the client's needs.
- Creating integrations with the Sharepoint API to fetch basic information from the organization's users or any other information requested by the customer.

EDUCATION:

Graduated in Information Systems | Faculdade 7 de Setembro – 2009 to 2014.
